📍 3/2 Street, Xuan Khanh Ward,
Ninh Kieu District, Can Tho City.

EDUCATION

Bachelor of Information Technology

2020 - 2024

GPA: 3.7

CERTIFICATIONS

- TOEIC 770

TECHNICAL SKILLS

Frontend

Next.js (SSR, SSG, ISR, Server Components), React, TypeScript

UI

Tailwind CSS, shadcn/ui, MUI, Framer Motion, React Spring

State & Data

React Query, RTK Query, Redux Toolkit, Zustand

Forms

React Hook Form, Zod, Formik, Yup

Auth

NextAuth, JWT (basic understanding)

Tools

Git, GitHub, CI/CD basics (GitHub Actions)

SUMMARY

Frontend Developer with nearly 1 year of experience building production web applications using **Next.js, React, and TypeScript**. Strong focus on **performance optimization, responsive UI, and user experience**. Experienced in real-time interactions, scalable component architecture, and modern frontend tooling. Comfortable collaborating in team environments and improving code quality.

EXPERIENCES

Teknix Corporation

Front-end Developer

[03, 2025] – Present

- Developed and maintained production applications using Next.js (App Router), React, TypeScript
- Collaborated with designers and backend engineers to deliver high-quality UI/UX
- Optimized performance, responsive layouts, and reusable component architecture
- Participated in code reviews, bug fixing, and feature planning

KEY PROJECTS

VoteMe – Event & Competition Voting Platform

- Implemented highly responsive layouts optimized for mobile and desktop
- Built a scalable voting system supporting multiple events with complex UI flows
- Optimized loading of very large images (~100MB) using image optimization strategies
- Applied Next.js rendering strategies (SSR/SSG/ISR) to balance performance and interactivity
- Used React Query for efficient data fetching, caching, and synchronization
- Built reusable UI components with Tailwind CSS, shadcn/ui, and animations via Framer Motion

Linktree-like Social Link Platform

- Developed a link-sharing platform with a real-time iframe-based preview editor
- Implemented undo/redo functionality for safer content editing
- Reduced unnecessary server requests by batching updates and optimizing client-side state
- Improved editing performance while maintaining real-time responsiveness
- Delivered a smooth UX with subtle animations and responsive UI

PERSONAL PROJECTS

Dynamic Portfolio Platform (Pet Project)

- Built a CMS-like dynamic portfolio inspired by Ghost
- Designed custom content system without external headless CMS
- Implemented post editor, admin dashboard, and NextAuth v5 authentication
- Optimized data loading via server-side prefetching + React Query hydration
- Added advanced UI customization (theming, cursor effects, page transitions)
- Continuously updated with Next.js 16 & modern React patterns
